

Ref: E80

3 January 1964

Dear Ray:

As you requested, I am enclosing a list of the personnel we will need during the installation of your plotter. This list also includes the additional information you require.

Installation activities break down into four areas: 1) supervision of the installation, 2) checkout of system logic, 3) checkout of the servos, and 4) checkout of the mechanical portions. The basic team required to perform these installation functions is listed below showing the areas in which each member will work:

	<u>Supervision</u>	<u>Logic</u>	<u>Servos</u>	<u>Mechanical</u>
	X			X
		X	X	
		X

In addition, we would like to call on , both of whom are engineers as well as officers of . Each of these gentlemen would not only represent the management of  at the installation, but in addition, could be called upon to handle any difficult problems which might arise. Both of them have previously visited the installation. STATOTHR

If you need any more data, please call.

STATOTHR  
Sincerely,

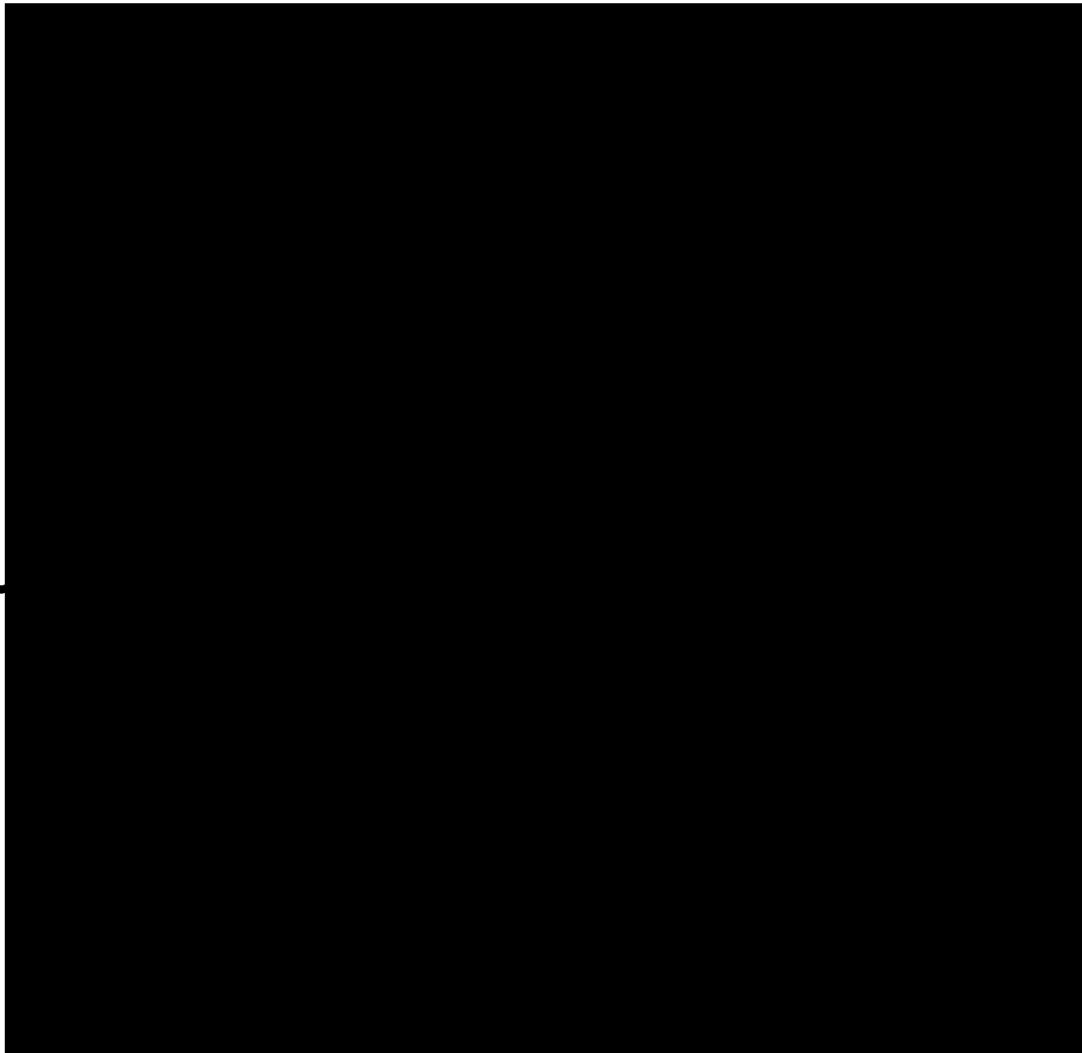

Project Engineer
